[User Manual 3.4.1 The Infinite Cone Interface](#)

This interface extends the InfiniteShape interface for the particular cases of infinite cones.

The infinite cones are defined by an origin and a closed curve : the lines passing through the origin and any points of the curve create their shapes.

The infinite cones only exist in a half space from their origin point and on the side of their positive axis vector. The available simple infinite cones are :

- right circular cones
- oblique circular cones
- rectangle cones
